

Do-Not-Disturb systems

DO-NOT-DISTURB SYSTEMS

The BE DUTCH electronic 'Do-not-disturb' systems (DND) are developed as an advanced and stylish replacement for traditional doorknob hangers in hotels. An electronic door bell is integrated for extra convenience. The guest selects 'Do not disturb' or 'Make Up Room' with one touch on the panel inside the room which is connected with the display outside. Once the DND function is activated, the doorbell does not function, which becomes also visible on the display.

Choose from seven models, in four different colours; black, champagne, white and silver. Hotel logo and room number in white, blue, green or yellow LED backlight on the glass models.

An electronic DND system offers your guests convenience and privacy, and clear information for your housekeeping
