What are you locking for?

How does it work?

From magnet to RFID

The Hotek RFID Upgrade Kits enables you to convert the current magnetic card system to RFID locks quickly and easily. It is the most efficient solution to make the system ready for the future and to offer the guests a user-friendly access control.

The contactless RFID system is insensitive to magnetic fields (smartphone) and works in combination with the Hotek SMART software. This offers advanced access control possibilities for hotels, resorts, cruise ships, etc.

Upgrade Classic

Upgrade HT24/28

The benefits:

- no more problems with erased or damaged magnetic keycards
- no wear and tear to locks and keycards
- easy to install
- no need to replace locks or doors
- a problem free and sustainable solution
