# WANNA PLAY?

## Connect 3.0: The next era in mobile key

Your Mobile Key is a part of Hotek Hospitality Group and offers the complete cloud-hosted platform that allows you to communicate directly with your customer, colleague, or guest at all times. It is easy to make real-time changes in the Web App and push new promotions or important messages. Your Mobile Key also offers an excellent opportunity to generate sales directly through the Web App interface.

In 2023 is version 3 of our hospitality platform launched. A completely new version of our state-of-the-art hospitality platform with many more possibilities. The system is continuously developed with monthly new functionalities.

# THE BENEFITS OF YOUR MOBILE KEY

## Developed in The Netherlands

The first mobile key made 100% in the Netherlands. No cheap software outsourced to countries with low wages like India and Moldova, where there is no data privacy protection, despite their claims that your data is safe. How can they control long-distance relationships? They can't.

## Innovation

The first mobile key that can be used without app download. The biggest problem with apps nowadays. Are they the future or are we future-proof? What came first, the chicken or the egg? We are both because we are open to everyone involved in the use of mobile keys. We create trends and are market leaders.

## Market leader

In the past 3 years, we have successfully implemented Your Mobile Key in over 800 hotels across Europe, with a dedicated 24/7 installation and service team that is highly trained to assist with technical support. Currently, we are experiencing over 1 million openings per year!

## Safe & secure

The hardware and software components have an AES 256 security layer for communication between slots, gateways, and cloud software. A never-before-seen level of encryption security. Each slot has its own unique encryption.

## 100% flexible

Hotek has over 90 active interfaces worldwide with Your Mobile Key. We can add the mobile key to your current system. In your PMS dashboard, you have all the data of your mobile keys integrated, along with seamless online check-in.

## Sustainable

Your Mobile Key is sustainable, as this solution allows us to reduce the use of plastic keycards by over 90%. Join our environmentally friendly program. No more paper waste, as all information for your guests and users will be available on their mobile phone.

# BLUETOOTH IS NOT SAFE

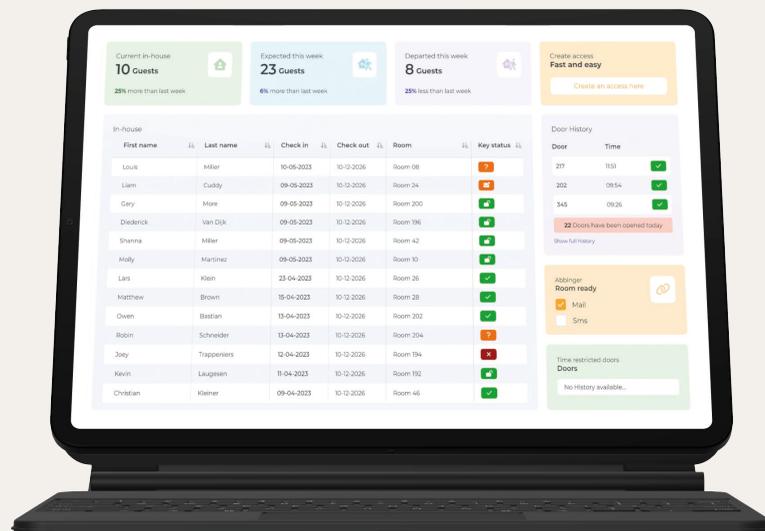

## That's why we don't use it for YourMobile Key

In today's world, Bluetooth technology is integrated into almost every device we use, from wireless headsets, mics and keyboards to cars and smart locks. But with the convenience of this technology comes the risk of privacy and security breaches. Every Bluetooth device has potential vulnerabilities that cybercriminals can exploit. At Hotek we believe in safety-first, that's why we choose to build a webApp.

## NO APP-INSTALL

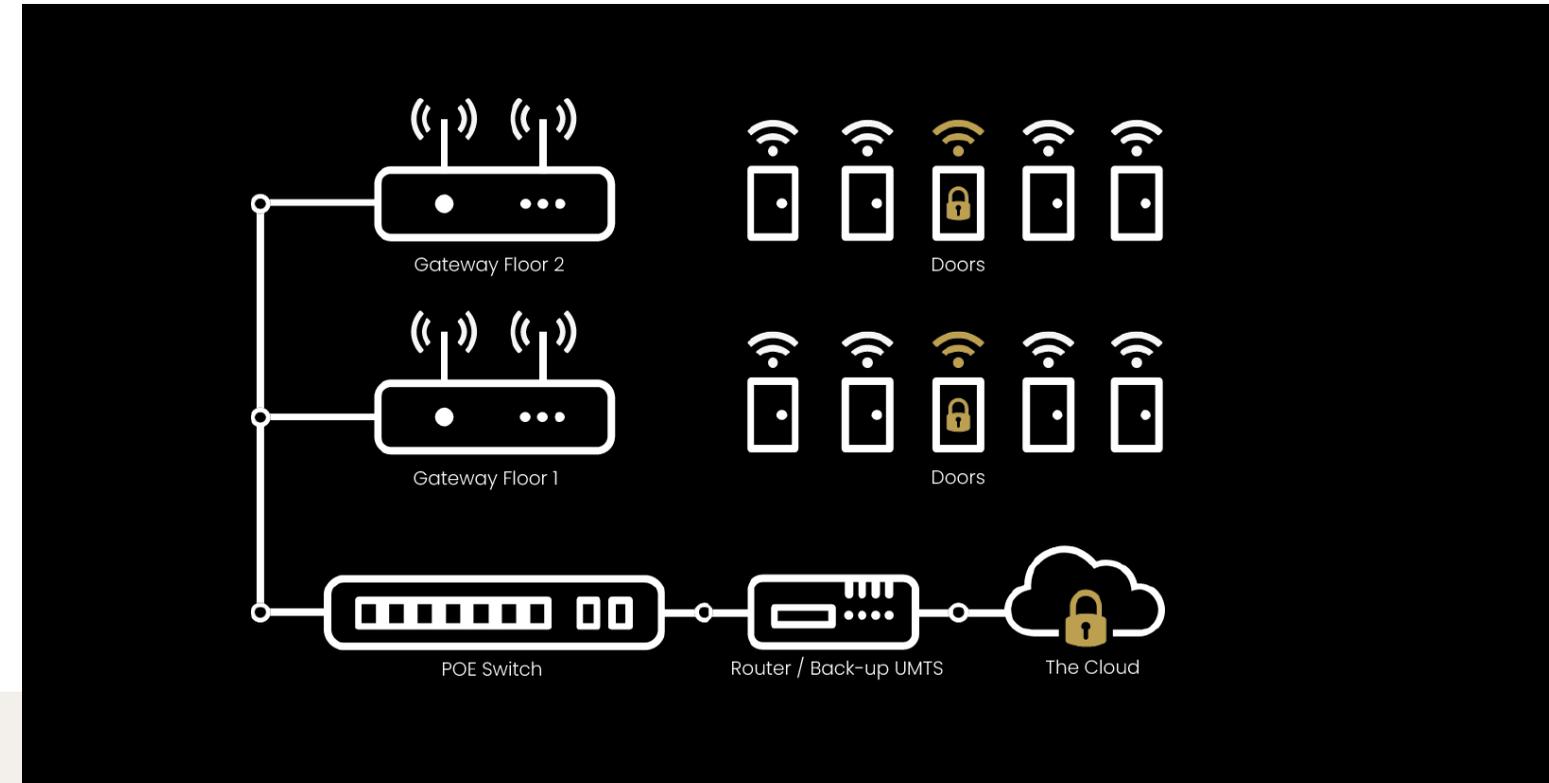

At YourMobile Key, we believe in putting the customer first. That's why we prioritize ease of use by offering a web-based solution that requires no app installation. Our web-app ensures seamless access for your guests without the hassle of downloading and managing additional apps.

## DASHBOARD

### YMK Plus and YMK Exclusive

After logging in to the CMS, you will see a dashboard with information about your locks and the guests present. You can also see which special lock settings are available and which door was last opened, or you can directly create a new digital key.

## SIMPLY WORKS WITH ANY HOTEL LOCK

### YourMobile Key is the solution

Your Mobile Key is simply the solution that always works. Your Mobile Key is in fact easy to integrate into the Hotek lock system, existing keycard systems from other suppliers, but also into newly installed lock systems. The workflow requires little to no additional hardware. The locks are connected to gateways per floor or department via the existing internet switch.
